2013	21.0%	11.3%	9.7%

CUMULATIVE PERFORMANCE

FUND SENSITIVITY TO EQUITY MARKET

COMMENTARY

February opened weaker as anxiety mounted over the strength of the US and China economic recoveries. In China both the manufacturing and services PMIs edged down. China's economy grew by 7.7% in 2013, the same rate as in 2012. The US economic data releases were mixed. Although the official unemployment rate fell to 6.6%, other statistics showed weakness largely attributed to the effects of a particularly harsh winter. In Europe fears of deflation returned as consumer prices rose by a mere 0.7% year-on-year in January, well below the ECB's 2% target.

Gold continued to battle to reconcile faltering US economic data against the backdrop of continued tapering by the US Fed. The recent spike in the gold price has been largely driven by geopolitical concerns, particularly in the Ukraine, as well as expectations of a slowdown in the US recovery. Markets were given a boost after the new US Fed chair pledged to keep interest rates low and to taper the pace of bond purchases if the economy keeps improving. However the US Fed emphasised that the speed of the tapering has not been predetermined. The market rally continued, propelled by positive news flow, including better than expected export numbers from China and a smooth suspension of the US's debt limit until March 2015.

In South Africa the rand retreated to R10.70 to the US dollar as negativity about emerging markets subsided and despite the continuation of strike action in the platinum sector and a shocking trade balance figure. On the economic front the Kagiso PMI remained unchanged at 49.9 in January, its weakest level since April 2013, and consumer inflation rose by an above-expectations 5.8% year-on-year. The unemployment figure for the fourth quarter of 2013 came in at 24.1%, down from 24.5% at the end of September.

South Africa's GDP growth jumped to an annualised 3.8% in the fourth quarter of last year, bringing 2013 GDP growth to 1.9%. The Minister of Finance, Pravin Gordhan, delivered an unexciting budget. The budget deficit is set to remain at 4% of GDP in 2014, before narrowing to 3.6% and 2.8% in the following two years. GDP growth forecasts have been lowered to 2.7% for 2014, 3.2% in 2015 and 3.5% in 2016. And inflation is set to average 6.2% this year, declining to 5.9% next year and 5.5% in 2016. The FTSE/JSE All Share Index rose by 4.9% with the Resources sector delivering 4.4%, the Financial sector 8.4% and the Industrials 5.1%. The BESA All Bond Index recovered by 2.4%, while the rand strengthened by 3.3% relative to the US dollar.

DISCLAIMER: Sygnia Collective Investments (RF) Proprietary Limited ("the Company") is a member of the Association for Savings & Investment SA (ASISA). Sygnia Asset Management (Proprietary) Limited, an authorised financial services provider, is the appointed investment manager of the Company. The Company is incorporated and registered under the laws of South Africa and is supervised by the Financial Services Board. Unit trust prices are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accruals and less any permissible deductions from the portfolio divided by the number of units in issue. Forward pricing is used and Fund valuations take place at approximately 16:00 each business day. Purchase and redemption requests must be received by the manager by 14:00 each business day to receive that day's price. A schedule of fees, charges and maximum commissions is available on request from the Company. Commission and incentives may be paid and if so, would be included in the overall costs. Permissible deductions may include management fees, brokerage, STT, auditor's fees, bank charges and trustee fees. Unit trusts are traded at ruling prices and the Fund may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Collective Investment Schemes in Securities (unit trusts) are generally medium- to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to the future.
