2012	14.6%	11.6%	3.0%
2013	21.0%	11.3%	9.7%

### CUMULATIVE PERFORMANCE

## FUND SENSITIVITY TO EQUITY MARKET

## COMMENTARY

The second half of 2014 started on an up, propelled by stronger US and Chinese economic data and the widespread belief that central banks will keep interest rates low for longer. The headline numbers for the US were a 4.0% annualised GDP growth rate in the second quarter and unemployment falling to 6.1%. The US Federal Reserve announced that it plans to stop its quantitative easing programme in October, while keeping interest rates low for a considerable time.

The eurozone looked less rosy, with inflation unchanged from May at 0.5% year-on-year. After launching a number of quantitative easing measures in June, the ECB left interest rates unchanged. European banking problems also reared their heads again after the parent company of one of Portugal's biggest banks failed to make payments on some short-term debt. The uncertainty translated into a spike in yields on Portugal's 10-year debt, with contagion spreading to Greek, Spanish and Italian debt markets. The geopolitical risks which dominated the headlines had relatively little impact on the markets. Violence in Ukraine, Iraq and Syria, and conflict between Israel and Palestine's Hamas militants did little to dent sentiment.

The accidental shooting-down of a Malaysian aircraft over the Ukraine however led to the US and the EU imposing wide-ranging sanctions on Russia. The IMF cut its global growth forecast for 2014 to 3.4% to take into account first quarter weakness in the US and China, warning that the dual crises in the Middle East and Ukraine could dent growth further.

In South Africa the season of strikes is far from over. Just as the platinum sector strike ended, Numsa embarked on a strike in the steel and engineering sector. The unemployment rate increased to 25.5% in the second quarter. Consumer inflation rose slightly less than expected to 6.6% year-on-year in June. The Reserve Bank increased rates by 0.25% to 5.75%, citing rising inflation concerns from precedent-setting double-digit wage settlements in the mining sector. The Bank also cut its growth forecast for 2014 to 1.7%. The inflation outlook has deteriorated with inflation now forecast to average 6.3% this year. The MPC indicated that future interest rate moves would be "gradual and highly data dependent".

The FTSE/JSE All Share Index rose by 0.9%, with the Resources sector rebounding by 5.1%. The Industrial sector fell by 1.3%, while Financials rose by 0.6%. The BEASSA All Bond Index delivered a 1.0% return, while the rand depreciated by 0.6% against the US dollar.

**DISCLAIMER:** Sygnia Collective Investments (RF) Proprietary Limited ("the Company") is a member of the Association for Savings & Investment SA (ASISA). Sygnia Asset Management (Proprietary) Limited, an authorised financial services provider, is the appointed investment manager of the Company. The Company is incorporated and registered under the laws of South Africa and is supervised by the Financial Services Board. Unit trust prices are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accruals and less any permissible deductions from the portfolio divided by the number of units in issue. Forward pricing is used and Fund valuations take place at approximately 16:00 each business day. Purchase and redemption requests must be received by the manager by 14:00 each business day to receive that day's price. A schedule of fees, charges and maximum commissions is available on request from the Company. Commission and incentives may be paid and if so, would be included in the overall costs. Permissible deductions may include management fees, brokerage, STT, auditor's fees, bank charges and trustee fees. Unit trusts are traded at ruling prices and the Fund may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Collective Investment Schemes in Securities (unit trusts) are generally medium- to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to the future.
