FINSOLNET MODERATE FUND

ABOUT THE PORTFOLIO

The Finsolnet Moderate Portfolio is a low to medium risk balanced portfolio that aims to deliver superior real returns over the medium to longer term with a strong focus on active management of capital loss risk over the shorter term.

The portfolio is managed on a multi-manager basis and includes international exposure. The strategic allocation to various asset classes is set out below. Each manager appointed within a particular asset class has been selected on the basis of rigorous quantitative and qualitative analysis.

The underlying managers have been selected, mandated, monitored and reviewed by Amadwala Asset Consulting on behalf of their clients.

The portfolio complies with Regulation 28 of the Pension Funds Act, 1956 as amended.

The portfolio is offered on a pooled and unitised basis on the Sygnia Life license.

PERFORMANCE COMMENTARY

The first half of June was dominated by the ECB's injection of monetary stimulus measures in order to spur inflation in the eurozone, which boosted market sentiment. The second half brought more volatility on the uncertainty around the timing of the US Federal Reserve's interest rate increases and increasing conflict in Iraq and the Ukraine.

The ECB cut interest rates to a record low of 0.15%, and introduced a negative interest rate of -0.1% on banks "parking" money at the ECB to encourage lending rather than hoarding. Markets soared, with the FTSE/JSE All Share Index rising above the 51 000 level, a new record. Mid-month the US Fed had to abate concerns of earlier than expected interest rate increases as US consumer inflation came in at 2.1% year-on-year in May, its highest level in two years. The US Fed reduced its monthly purchases on bonds by a further US\$10 billion to US\$35 billion.

By month end geopolitical risks caused increased volatility. Apart from the conflict in Iraq, Russia cut off gas supplies to the Ukraine in a dispute over payment. Tensions escalated further after the Ukraine signed a trade agreement with the EU. The eurozone continued to battle falling inflation and signs of a slow down, while in the US the effects of the first quarter cold weather spell came through in the second quarter data, including a downward revision of its first quarter GDP figure to a 2.9% contraction. However China reported stronger figures, supporting the government's contention that the economy might avoid a hard landing.

In South Africa, AMCU finally agreed to end the five-month platinum strike, but NUMSA threatened to cripple the auto industry once again by striking over wages. On the economic front all indicators point to a slowdown, increasing the likelihood of a negative growth rate in the second quarter and an official recession. Most significantly the S&P downgraded South Africa's credit rating to BBB with a stable outlook, just one level above junk, while Fitch changed its rating outlook to negative. The World Bank has lowered South Africa's projected economic growth rate for 2014 to 2.0%, and its global growth forecast to 2.8%. The FTSE/JSE All Share Index rose by 2.8%, with the Resource sector rising by 3.5%, the Industrial sector by 2.8% and the Financial sector by 2.7%. The BEASSA All Bond Index delivered 1.0%, while the rand weakened against the US dollar by 0.6%.
