COMMENTARY

Statesmanship was the game in town as German Chancellor Angela Merkel and French President Francois Hollande brokered a ceasefire between Russia and the Ukraine, and averted an imminent Greek tragedy. Stock markets reacted well to what may well be only temporary Band-Aid resolutions.

The US released a disappointing Q4 2014 GDP growth figure of an annualised 2.6%, bringing overall 2014 growth to 2.4%. Any slowdown is expected to be temporary given the enormous tail-wind provided by lower oil prices. China started 2015 on a weak note with the official manufacturing PMI contracting and inflation slowing to 0.8% year-on-year. The eurozone surprised with Q4 growth of 0.3% after Germany expanded at double the expected rate. The numbers were less rosy for the rest of the eurozone. Annual inflation in January hit a negative 0.6%.

The markets remained volatile as Greece tried to negotiate its way out of complying with austerity measures imposed in exchange for its €240 billion bail-out in 2010. Agreement was finally reached on a four month delay, heading off an imminent default.

The oil price rallied to above US$60 a barrel on supply disruptions in Libya and Iraq. The gold price fell to US$1 200 an ounce on news that Greece had secured a rescue deal.

South Africa's data releases pointed to a subdued economy. Q4 2014 GDP growth came in at an annualised 4.1%, bringing overall 2014 growth to a meager 1.5%. 2015 is not looking much different, with tax increases, electricity rate hikes and rolling blackouts on the horizon. The CPI slowed to 4.4% year-on-year in January. The 2015/16 budget was rated as conservative enough to avoid credit rating downgrades. Inflation is forecast to average 4.5% in 2015 and growth 2.0%.

The FTSE/JSE All Share Index returned 4.1%, driven by the Resources sector which delivered a massive 8.7%. The FTSE/JSE SA Listed Property Index rose by 3.2%. The BESA All Bond Index fell by 2.8% on foreign selling, while the Rand remained largely flat for the month against the US dollar.
