COMMENTARY

November brought a spew of disheartening news, including new frontiers for terror with an attack on Paris and a shut-down of Brussels, numerical confirmation of slowing global economic growth and a further collapse in commodity prices. Despite all of that, the most meaningful consideration for investors remained the rising certainty that the US Federal Reserve will increase interest rates in December. The expectations of an imminent US interest rate hike strengthened the US dollar, a negative for commodities and the rand which hovered between R14.15/US\$ and R14.50/US\$ through November.

Heedless of global woes the US economy continued to grow at a moderate pace, supporting the argument for a hike. October was the best month for job creation this year, with the official unemployment rate dropping to 5.0%, which is regarded as "full employment". The third quarter GDP growth number was revised upwards to an annualised 2.1%. While the US Fed is poised for tightening, the ECB is readying for more stimulus in response to a visible slowdown in the eurozone, where the third quarter GDP number came in at 0.3% quarter-on-quarter as exports weakened. The European Commission forecasts that the GDP in the 19-nation eurozone will grow by 1.6% this year and 1.8% in 2016.

China's economic data continued to disappoint as the country seems to be readying to cut its official five-year economic growth target to 6.5%.

There was no shortage of bad news in South Africa which is waiting for credit rating updates due in the first week of December. The economy continued to battle drought and low commodity prices, while the rand collapsed to new lows against the US dollar. Consumer inflation came in at a surprisingly benign 4.7% year-on-year in October, lagging in reflecting the effect of the weak rand. The Reserve Bank increased the repo rate by 0.25% for the second time this year to 6.25%, taking the prime lending rate to 9.75%. South Africa's economy avoided a technical recession by growing at a seasonally adjusted and annualised 0.7% in the third quarter, after contracting by 1.3% in the second quarter.

The FTSE/JSE SWIX index fell by 2.7%, pulled down by the sharp 22.5% drop in resources shares. Financials returned -4.0%, while the industrials fell by 1.0%. The JSE All Bond Composite index dropped by 1.0%, while the rand finished the month 4.5% down relative to the US dollar at R14.43/US\$.

The Fund may be closed to new investments at any time in order to be managed in accordance with its mandate. Sygnia Collective Investments (RF) Proprietary Limited ("the Company") is a member of the Association for Savings and Investment SA (ASISA). Sygnia Asset Management (Proprietary) Limited, an authorised financial services provider, is the appointed investment manager of the Company. The Company is incorporated and registered under the laws of South Africa and is registered under the Collective Investment Schemes Control Act, 2002 (Act No 45 of 2002). The Company does not provide any guarantee with respect to the capital or return of the portfolio. Nothing in this document will be considered to state or imply that the collective investment scheme or portfolio is suitable for a particular type of investor. All figures used are merely for illustrative purposes only.

UNIT PRICES

Unit trust prices are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accruals and less any permissible deductions from the portfolio divided by the number of units in issue. Forward pricing is used and Fund valuations take place at approximately 16:00 each business day. Purchase and redemption requests must be received by the manager by 14:00 each business day to receive that day's price.

Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending to bridge insufficient liquidity. Collective Investment Schemes in Securities (unit trusts) are generally medium- to long-term investments. The value of units may go down as well as up and past performance is not necessarily an indicator of future performance.

FEES

The annual management fee comprises applicable basic fees paid to underlying managers, Sygnia's annual service fee and advice fees payable to financial advisors (where applicable). Any balance remaining after payment of these amounts is rebated back to the Fund.

A schedule of fees, charges and maximum commissions is available on request from the Company. Commission and incentives may be paid and if so, would be included in the overall costs. Permissible deductions may include management fees, brokerage, STT, auditor's fees, bank charges and trustee fees.

Initial and ongoing advice fees may be facilitated on agreement between the Client and Financial Advisor. The payment of these fees is facilitated by the LISP and not directly by Sygnia.

Performance based fees are calculated in terms of the supplemental deed for certain of our asset managers where they outperform the Fund's stated benchmark. This performance fee will be paid by the Fund to the underlying investment manager and only when the Fund's performance exceeds that of the benchmark.

TER

The TER is calculated as a percentage of the average net asset value of the portfolio incurred as charges, levies and fees in the management of the portfolio. The TER includes the annual management fees (both basic and performance fees), VAT and other expenses. The TER does not include transaction costs. Since unit trust expenses vary, the current TER cannot be used as an indication of future TERs. A higher TER ratio does not necessarily imply a poor return nor does a low TER imply a good return. The current disclosed TER cannot be regarded as an indication of future TER's. Instead, when investing, the investment objective of the Fund should be consistent with the investor's objective and the performance of the Fund should be compared to that objective. TERs should then be used to evaluate whether the Fund's performance offers value for money. Initial and ongoing advice fees may be facilitated on agreement between the Client and Financial Advisor.

PERFORMANCE

Collective Investment Schemes in Securities (unit trusts) are generally medium- to long-term investments. The value of units may go down as well as up and past performance is not necessarily an indicator of future performance.

INVESTMENT POLICY

The Sygnia CPI + 2% Fund is a multi-asset class fund managed with a low exposure to equities in order to seek a low volatility of returns while still seeking to achieve long term returns of at least 2% per annum above inflation. The fund will have exposure to both domestic and foreign assets, which will include equities, fixed interest and money market assets and the fund will comprise a number of underlying portfolios managed by a range of different managers selected by Sygnia. The fund has a benchmark of CPI + 2% per annum and will maintain a total equity exposure of below 40% of the portfolio.
