2009	20.4%	11.8%	8.6%
2010	10.3%	9.6%	0.8%
2011	9.9%	12.1%	-2.3%
2012	14.5%	11.6%	2.9%

### CUMULATIVE PERFORMANCE

## FUND SENSITIVITY TO EQUITY MARKET

## COMMENTARY

April brought an abrupt end to the bull market in commodities, and in particular gold, as commodity prices fell on rising concerns about slowing growth prospects in the US and China.

The FTSE/JSE All Share Index declined 2.5%, pulled down by the Resources sector which fell by 8.5%. The Gold Mining sector lost a massive 19.3%, while the Platinum Mining sector fell by 10.2%. The BESA All Bond Index, on the other hand, came in at a strong 4.1% on the resumption of foreign interest, while the Rand strengthened by 2.8% against the US dollar. In Europe, both the Bank of England and the ECB kept interest rates on hold despite mounting evidence that the eurozone is slipping deeper into recession. However, expectations that the ECB will act in May helped to revive markets at month-end.

The magnitude of new stimulus measures announced by Japan's central bank, at three times the US Federal Reserve's stimulus as a share of the economy, caught the market by surprise. The Bank aims to double the amount of money in circulation to boost inflation to 2% within 2 years. If nothing else, the injection of money is expected to reignite the yen "carry trade" as Japan's institutions seek higher yields offshore.

The gold price started to slide mid-month after Cyprus's central bank announced a US\$400 million sale of gold reserves, setting an uncomfortable precedent for other heavily indebted nations such as Italy and Portugal. It deteriorated further after the announcement of a slowdown in China's economic growth to an annualised 7.7% in the first quarter. The gold price sank to a low of US\$1 321.35/oz by 16 April, before rebounding to US\$1 476.75/oz by month-end after the first estimate of US first quarter GDP growth came in at a lower-than-expected annualised rate of 2.5%.

In South Africa labour unrest continued against a backdrop of lacklustre economic data with labour relations expected to remain fraught through 2013. The bus industry is already on strike, while the motor and mining industries are preparing for negotiations. This is not great news for the rand, which has had a turbulent time of late. The currency has fallen by 5.9% against the US dollar since the start of 2013 on the back of massive current account deficit numbers. However, the currency strengthened to R8.97/US dollar at month-end on the positive news that South Africa's trade deficit had narrowed to R7.8 billion in March. Consumer inflation was unchanged at 5.9% year-on-year in March, slightly below expectations.

## HISTORICAL PERFORMANCE

	JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC	YEAR
2009	-1.1%	-7.2%	5.1%	1.4%	4.9%	-0.2%	7.1%	3.9%	0.4%	3.6%	-0.8%	2.5%	20.4%
2010	-0.7%	1.4%	2.7%	1.1%	-2.7%	-0.8%	2.9%	-0.8%	3.9%	1.7%	0.1%	1.2%	10.3%

**DISCLAIMER:** Sygnia Collective Investments (RF) Proprietary Limited ("the Company") is a member of the Association for Savings & Investment SA (ASISA). Sygnia Asset Management (Proprietary) Limited, an authorised financial services provider, is the appointed investment manager of the Company. The Company is incorporated and registered under the laws of South Africa and is supervised by the Financial Services Board. Unit trust prices are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accruals and less any permissible deductions from the portfolio divided by the number of units in issue. Forward pricing is used and Fund valuations take place at approximately 16:00 each business day. Purchase and redemption requests must be received by the manager by 14:00 each business day to receive that day's price. A schedule of fees, charges and maximum commissions is available on request from the Company. Commission and incentives may be paid and if so, would be included in the overall costs. Permissible deductions may include management fees, brokerage, STT, auditor's fees, bank charges and trustee fees. Unit trusts are traded at ruling prices and the Fund may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Collective Investment Schemes in Securities (unit trusts) are generally medium- to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to the future.
