CUMULATIVE PERFORMANCE

FUND SENSITIVITY TO EQUITY MARKET

COMMENTARY

February started with the resources sector surging on the back of stronger economic data from China and the US. But the rally came to an abrupt halt mid-month, with commodities leading the sell-off, as investors took risk off the table on concerns about the continuation of the US Fed's QE3 programme and the stability of the euro zone after Italian elections resulted in a hung parliament and a corruption scandal rocked Spain. The slump in the markets forced the US Fed Chairman, Ben Bernanke, to reiterate that asset purchases will continue until the labour market outlook improves. This combined with better-than-expected US housing and consumer confidence data, and the news of a successful Italian debt auction, helped to stabilise the markets.

Gold had a ferocious month, falling below US\$1 600, as its inability to break through the US\$1 700 price ceiling eroded investors' interest. The world's major industrial nations pledging to avoid devaluing their exchange rates in the pursuit of stronger economic growth, but stopped short of naming Japan as a culprit. Moody's cut the UK credit rating from triple A to Aa1, citing the continued weakness in the country's growth outlook and the high debt burden.

In the US the Democrats and the Republicans failed to reach an agreement on the US\$1.2 trillion of spending cuts over nine years that are due to take effect on 1 March.

In South Africa, the fourth quarter GDP growth quickened to 2.1% quarter-on-quarter, bringing economic growth to 2.5% for 2012. CPI inflation came in below expectations at 5.4% year-on-year in January. The Kagiso manufacturing PMI inched up to 49.1, but remained below the 50 level for a fifth consecutive month. The Adcorp Employment Index fell by an annualised 3.2% on employers cutting seasonal jobs.

The Budget concentrated on expenditure cuts (R10.4 billion over three years) as sluggish economic growth and a R16.3 billion shortfall in tax revenue resulted in a budget deficit for 2012-13 of 5.2% of GDP. Economic growth forecasts have been lowered to 2.7% for 2013, while inflation is expected to average 5.5% a year over the next three years. Much reliance has been placed on massive infrastructure investments to drive growth.

The FTSE/JSE All Share Index ended the month 1.9% down, pulled down by the Resources sector which fell by 6.4%. Financials dropped by 1%, while Industrials rose by 0.1%. The BESA All Bond Index delivered a 0.7% return.

DISCLAIMER: Sygnia Collective Investments (RF) Proprietary Limited ("the Company") is a member of the Association for Savings & Investment SA (ASISA). Sygnia Asset Management (Proprietary) Limited, an authorised financial services provider, is the appointed investment manager of the Company. The Company is incorporated and registered under the laws of South Africa and is supervised by the Financial Services Board. Unit trust prices are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accruals and less any permissible deductions from the portfolio divided by the number of units in issue. Forward pricing is used and Fund valuations take place at approximately 16:00 each business day. Purchase and redemption requests must be received by the manager by 14:00 each business day to receive that day's price. A schedule of fees, charges and maximum commissions is available on request from the Company. Commission and incentives may be paid and if so, would be included in the overall costs. Permissible deductions may include management fees, brokerage, STT, auditor's fees, bank charges and trustee fees. Unit trusts are traded at ruling prices and the Fund may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Collective Investment Schemes in Securities (unit trusts) are generally medium- to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to the future.
