

# October/12

## FINSOLNET MODERATE FUND

### ABOUT THE PORTFOLIO

The Finsolnet Moderate Portfolio is a low to medium risk balanced portfolio that aims to deliver superior real returns over the medium to longer term with a strong focus on active management of capital loss risk over the shorter term.

The portfolio is managed on a multi-manager basis and includes international exposure. The strategic allocation to various asset classes is set out below. Each manager appointed within a particular asset class has been selected on the basis of rigorous quantitative and qualitative analysis.

The underlying managers have been selected, mandated, monitored and reviewed by be Amadwala Asset Consulting on behalf of their clients.

The portfolio complies with Regulation 28 of the Pension Funds Act, 1956 as amended.

The portfolio is offered on a pooled and unitised basis on the Sygnia Life license.

### PERFORMANCE COMMENTARY

October brought turmoil to South Africa in the strongest challenge yet to the ANC-led government, as a series of strikes in the mining and transport sectors triggered sovereign rating downgrades. Hard-charging markets, spurred by the expectations that Greece will not be kicked out of the euro and that the ECB and the US Fed will use their balance sheets to provide support, were rattled by Spain's resistance to ask for aid and an apparent back-peddling by Germany, Finland and the Netherlands over the recapitalisation of Spanish banks. In the US, the policy debates between President Barack Obama and the Republican-nominee, Mitt Romney, took centre stage as the polls indicated that the two are running neck and neck. The third quarter US earnings reports were muted. The month-end brought havoc to the US as Hurricane Sandy swept through the East Coast, leading to a two-day close of the New York Stock Exchange.

Third quarter GDP growth figures were a mixed bag. China came in at 7.4% year-on-year, with most analysts predicting that the economy has bottomed out. The US economy grew at an annual rate of 2.0%, largely as a consequence of stronger than expected consumer spending. And the UK exited the recession with a strong 1% year-on-year rebound. The EU figures are still outstanding, but the manufacturing activity PMIs point to most economies stabilising, albeit at very weak levels.

The South African rand plunged to its weakest levels against the US dollar in three years as strikes, sovereign downgrades (Moody's followed S&P in downgrading South Africa's credit rating) and political tensions battered investor confidence. Despite that, the equity market roared ahead with a string of record highs reached on foreign buying. The main theme of the MTPBS presented by the Finance Minister Pravin Gordhan was to restrain government spending over the next three years. The GDP growth for 2012 was revised downward to 2.5%, while consumer price inflation is forecast to remain below 6% over the next three years. Both current account and budget deficits were revised upward.

The gold price failed to break through a key US\$1 800 an ounce level as stronger US economic data tempered expectations of the scope of the Fed's latest stimulus programme. Oil prices, on the other hand, oscillated around the US\$110 a barrel level, with tensions in the Middle East outweighing concerns about sluggish global demand.

The FTSE/JSE All Share Index delivered a healthy 4.2% return, with the Resources sector rebounding by 6.3%. The BESSA All Bond Index reflected foreign investors' concerns about South Africa with a return of -0.6%. And the rand depreciated by 4.4%.
